SUBJECT INDEX

Acetyltransferase, macrophages 233
Acetyl-CoA carboxylase
  allosteric regulation 120
  phosphorylation 121–139
  protein kinases acting on 121
  protein phosphatases acting on 129
  structure and function 119
Acetyl-CoA carboxylase kinase-2 123
Actin filaments, collagen-stimulated platelet activation 279, 292
Acylation, glycerophospholipid synthesis 216
Acyl CoA hydrolases, brown adipose tissue 78, 79
Adenine nucleotides, brown adipose tissue 83
Adenosine monophosphate-activated protein kinase
  acetyl-CoA carboxylase phosphorylation 123, 139
  physiological roles 139
  regulation *in vivo* 141
Adenosine-3', 5'-monophosphate-dependent protein kinase 121, 131, 133, 139
Na^+, K^+-Adenosine triphosphatase, obese Zucker rat 58
Adenylate cyclase, brown adipose tissue 84
Adipocyte lipid binding protein 246, 252, 265
  genes 256, 259
Adipocytes, acetyl-CoA carboxylase phosphorylation 130
Adipose growth, obese Zucker rat 54
Adipose tissue, fatty acid binding proteins 265
Adrenoleucodystrophy, VLCFA accumulation 180
α-Adrenergic receptors, brown adipose tissue 83, 85, 102
β-Adrenergic receptors, brown adipose tissue 83, 84, 102
Algae, VLCFA 153
n-Alkanes
  dietary sources 190, 191
  intestinal absorption 193
Alveolar macrophages, glycerophospholipids 207
Amphibians, lipid water barriers 18
Anthracene, intestinal absorption 199
Aquatic organisms, lipid water barriers 24
Arachidonic acid
  metabolism in platelets 274
  regulation of phospholipases in platelets 277
  release from glycerophospholipids 224
  release by phospholipases 276
  sources in platelets 275
Aromatic hydrocarbons, intestinal absorption 197
Arthropods, lipid water barriers 12
Artificial membranes 5

Bacteria, VLCFA 158
Barrier lipids 2
Benzo(a)pyrene, intestinal absorption 199, 200
Bile acids, Zellweger's syndrome 46
Bile salt-lipid systems, hydrocarbon solubilization 193, 199
Bilin-binding protein 249
Biomembranes
  artificial membranes 5
  distribution and composition 3
  molecular organization 4
  water permeability 7
Birds, lipid water barriers 21
Blood flow, brown adipose tissue 86
Brain, VLCFA in Zellweger's syndrome 38, 175
Branched chain fatty acids, Zellweger's syndrome 41
BRL 26380A 103
Brown adipocytes 71
Brown adipose tissue thermogenesis 67–115
  adrenergic receptor-mediated responses 83
  antiobesity drugs 102
  assessment 74
  blood flow 86
  carbohydrate metabolism 80
  diet 87
  growth 88
  hypothalamus 72
  lipid metabolism 76
  morphology and innervation 70
  nitrogen metabolism 83
  obese humans 101
  obese rodents 95
  obese Zucker rat 58
  thyroid hormone metabolism 85
  uncoupling protein 72

Cafeteria diet 59, 63, 72, 87
Calcium
  arachidonic acid release from glycerophospholipids 227
  phosphatidylinositol metabolism 228, 230
  regulation of phospholipases in platelets 277
  TXA_2-induced mobilization in platelets 285
Calorie intake, obese Zucker rat 54
Carbohydrate metabolism, brown adipose tissue thermogenesis 80
Carcinogenic hydrocarbons, intestinal absorption 199
β-Carotene, intestinal absorption 197
Casein kinases-1 and -2, acetyl-CoA carboxylase phosphorylation 127
Cellular retinoid binding protein 246
  genes 263
Cellular retinol binding proteins I and II 246, 255
  genes 263
Chemical ionization-mass spectrometry, VLCFA 150
Cholecystokinins, obese Zucker rat 63
Cholesterol
  arthropod cuticle 14
  Zellweger's syndrome 45
Choline glycerophospholipids 207, 208, 211
  synthesis 214
Ciglitazone 103
Clenbuterol 103
Cocoons, lipid water barriers 28
Cold exposure, brown adipose tissue thermogenesis 88, 90
Collagen, stimulated platelet activation 289

Collagen receptor, platelets 293
Cooking oils
  cyclic fatty acid in 303
  cyclic fatty acids formed during heat treatment 311
Cori cycle 82
  Corticosteroids, brown adipose tissue thermogenesis 94
Corticosterone, obesity 61
Cutin 166
Cyclic fatty acids
  biological effects 326–333
  formed during heat treatment 311, 328
  monomers 313, 320–326
  naturally occurring 304
Cyclohexane, intestinal absorption 195
Cyclooxygenase, platelets 275
Cyclopentenyl fatty acids
  analysis 305
  biological effects 327
  occurrence 304
Cyclopropane fatty acids 306
  biological effects 326
  occurrence 307
  reactivity and analysis 308
  structure 310
Cytokines, production from macrophages 235
Cytoskeleton, activation of platelet phospholipases 292
Cytosolic lipid carriers 246

Development, brown adipose tissue 94
Diabetes, brown adipose tissue 91, 92
Diet, brown adipose tissue thermogenesis 72, 87, 95
Diet-induced obesity 100
Dihydroxyacetonephosphate acyltransferase, Zellweger's syndrome 42, 44
β-Diketones, plant cuticle 11
7, 12-Dimethylbenzanthracene, intestinal absorption 199

Eggs, lipid water barriers 26
Energy balance
  obesity 57
  thermogenesis 69
Epidermal growth factor, acetyl-CoA carboxylase activation 133
Erythrocytes, water permeability 7, 8
Estrogens, obese Zucker rat 62
Ethanolamine glycerophospholipids 207, 208, 211
Ether lipids, Zellweger's syndrome 42
Exercise-training, brown adipose tissue 91
Eye, VLCFA in retina 171

Fa/fa rat 53
  brown adipose tissue thermogenesis 96
Fast atom bombardment-mass spectrometry, VLCFA 150
Fasting, brown adipose tissue atrophy 91
Fat, dietary, acetyl-CoA carboxylase in mammary gland 139
Fatty acid binding proteins 245
  adipose tissue 264
  genes 254
  heart 263, 268
  intestine 262, 267
  ligand binding 253
  liver 262, 266
  molecular structure 249
  peripheral nerve myelin 266
  role in lipid metabolism 264
  yeast 268
Fatty acids
  cyclic 303–336
  dietary, brown adipose tissue thermogenesis 87
  glycerophospholipids 209
  intracellular trafficking 245–272
  metabolism and brown adipose tissue thermogenesis 76
  obese Zucker rat 56
  regulation of synthesis via acetyl-CoA carboxylase phosphorylation 117–146
  very long chain, animal and plant kingdoms 147–187
  Zellweger's syndrome 35
Fatty acyl-CoA esters, regulation of AMP-protein kinase 142
$Fc_{\gamma 2}$ receptors, macrophages 222
Feeding
  brown adipose tissue thermogenesis 87
  obese Zucker rat 53, 63
Fenfluramine 103
Fish
  hydrocarbons in 191
  VLCFA in 180
Food, thermogenesis 68
Frog, lipid water barriers 19
Frying oils, cyclic fatty acids in 303–336
Fungi, VLCFA 157
Futile cycling, obese Zucker rat 57

Gallstones 196, 197
Gas chromatography-mass spectrometry, VLCFA 149
Gastrointestinal bacteria, hydrocarbon metabolism 195
Gastrotropin 246
Glucagon
  acetyl-CoA carboxylase activation 133
  brown adipose tissue thermogenesis 93
  obese Zucker rat 62
Glucocorticoids, brown adipose tissue thermogenesis 94
Glucose
  fatty acid synthesis 118
  utilization by brown adipose tissue 80
Glycerophospholipid
  arachidonic acid release 224
  biosynthesis in macrophages 213–220
  composition 207
  metabolic changes associated with phosphatidylinositol 228
  metabolism in stimulated macrophages 220
  molecular species 210
  phospholipases 220
  platelet activating factor 232
Glycolysis, brown adipose tissue 81
Goldthioglucose, brown adipose tissue thermogenesis 99
Gonadotropins, obese Zucker rat 62
  G-protein
  phosphatidylinositol breakdown 231
  regulation of platelet phospholipases 278
  TXA_2=induced platelet activation 286
Growth hormone, obese Zucker rat 62

Hair, VLCFA 167
Harderian glands 171
Heart
  fatty acid binding protein 268
  fatty acid binding protein gene 263
Heat treatment, cyclic fatty acid formation in cooking oils 311
Hepatocytes, acetyl-CoA carboxylase phosphorylation 130
Heptadecane, intestinal absorption 195
Hexadecane, intestinal absorption 194
High performance liquid chromatography
  glycerophospholipids 211
  VLCFA 149
HMG-CoA reductase 140, 141
Hormone-sensitive lipase
  brown adipose tissue thermogenesis 76, 88
  phosphorylation by AMP-protein kinase 140
Hydnocarpic acid 328
Hydrocarbons
  arthropod cuticle 14
  dietary 190
  intestinal absorption 192–201
  plant cuticle 9
Hyperphagia, fatty rat 53
Hypothalamus, brown adipose tissue thermogenesis 72, 95, 99

ICI 198157, brown adipose tissue thermogenesis 103
Inflammation, macrophages 222
Insects, lipid water barriers 12, 25
Insulin
  acetyl-CoA carboxylase activation 133, 135, 136
  brown adipose tissue responsiveness 80, 92
  obese Zucker rat 60
Insulin receptor, adipocytes, obesity 61
Interleukin-1, production from macrophages 235
Intestine
  fatty acid binding protein 267
  fatty acid binding protein genes 262
  hydrocarbon absorption 189–203
Isoniazid, inhibition of VLCFA synthesis 155

Keratin 18
  mammals 22
  reptiles 20
Ketogenesis, obese Zucker rat 56
Ketones, plant cuticle 9

Lactate, hepatic fatty acid synthesis 118
Lactation
  acetyl-CoA carboxylase in mammary gland 138
  brown adipose tissue 91
β-Lactoglobulin 249
Land's pathway 216
Leaves, lipid water barriers 8
Limonene, intestinal absorption 197
Linolenic acid, cyclic fatty acids formed from 313, 329
Linseed oil, cyclic fatty acids formed from 311, 313, 328
Lipid bilayer
  artificial 5
  membrane fluidity 4
  water permeability 6
Lipid binding proteins 246
  adipose tissue 265
  heart 268
  intestinal epithelia 267
  isoforms 251
  ligand binding 253
  liver 266
  molecular structure 248
  peripheral nerve myelin 266
  yeast 268
Lipid binding protein genes 254
  chromasomal location 257
  evolution 255
  regulation of expression 258
Lipid, dietary, brown adipose tissue thermogenesis 87
Lipid–protein interactions 248
Lipid water barriers 1–33
  amphibians 18
  aquatic organisms 24
  arthropods 12
  biomembranes 3
  birds 21
  cocoons 28
  eggs 26
  mammals 22
  plants 8
  reptiles 19
  seeds 26
  surface waxes and integumental waterproofing 8
Lipocalin 249
Lipocortin
  macrophages 223
  regulation of platelet phospholipases 278, 294
Lipogenesis, brown adipose tissue 79
Lipolysis, brown adipose tissue thermogenesis 76
Lipoprotein, obese Zucker rat 55
Lipoprotein lipase, brown adipose tissue 77, 88
Liposomes 6
Liver
  fatty acid binding protein 266
  fatty acid binding protein genes 262
  VLCFA in 175
LY 104119, obesity 103

Macrophages 206
  arachidonic acid release from glycerophospholipids 224
  glycerophospholipids in 207
  glycerophospholipid synthesis in 213–220
  lipocortin 223
  phospholipases in 220
  platelet activating factor 232–236
Mammals, lipid water barriers 22
Mammary acinar cells, fatty acid synthesis 138
Mammary derived growth inhibitor 246
Marinetti pathway 220
Mazindol 103
Meibomian gland 168, 170
Membrane fluidity 4
  water permeability 7
Menthene, intestinal absorption 196
Mineral oils 192
Mitochondria, brown adipose tissue 73, 78
Monocytes, glycerophospholipids 206
Monolayers, arthropod cuticle 17
Monosodium glutamate, obesity 97
Mycobacteria, VLCFA 154, 182
Mycolic acids, biosynthesis 182
Myelin, fatty acid binding protein 266

Myelin P2 246, 249, 253, 256
genes 259
β-Myrcene, intestinal absorption 196

NA^+/H^+ antiporter, regulation of platelet phospholipases 278
Naloxone, feeding 63
Naphthalenes, intestinal absorption 198
Neuropeptides, obese Zucker rat 63
Nitrogen metabolism, brown adipose tissue thermogenesis 83
Nonacosane, intestinal absorption 194
Noradrenaline, brown adipose tissue 71, 76, 80, 81, 84–87

Obese humans, brown adipose tissue thermogenesis 101
Obese rodents, brown adipose tissue thermogenesis 95
Obese Zucker rat
adipose growth 54
brown adipose tissue thermogenesis 58
endocrine environment 60
futile cycling 57
hyperphagia 53
protein turnover 59
Obesity
antiobesity drugs 102
diet induced 100
Oils
cyclic fatty acids in 304
cyclic fatty acids formed during heat treatment 311
ONO-3708 281
Osmoregulation 25

Paraffins
dietary 190
intestinal absorption 194
Peroxisomes
brown adipose tissue fatty acid oxidation 78
cholesterol metabolism 45
ether lipid biosynthesis 44
phytanic acid oxidation 41
VLCFA CoA synthetase 37
Zellweger's syndrome 35, 47
Phagocytosis 206, 226
Phenanthrene, intestinal absorption 199
Phosphatidylcholine, brain, Zellweger's syndrome 39
Phosphatidylinositol
breakdown 225
breakdown coupling with G-protein 231
enhancement of turnover 228
regulation of degradation by calcium 235
synthesis 215
Phospholipase A_2
macrophages 220, 230
platelets, arachidonic acid release 276
platelets, cytoskeleton and activation of 292
Phospholipase C
macrophages 223, 230
platelets, arachidonic acid release 276
Phospholipids
biomembranes 3, 5, 6
sponges 164

Phytanic acid
oxidation in Refsum's disease 181
oxidation in Zellweger's syndrome 41
Pituitary hormones, brown adipose tissue thermogenesis 94
Plants
dietary hydrocarbons 190, 196, 197
lipid water barriers 8, 24
VLCFA 165
Plant-seed oils 166, 304–333
Plasmalogen, synthesis in Zellweger's syndrome 42
Platelet activating factor 207
effect on macrophage function 234
metabolism 233
production from macrophages 232
Platelets
arachidonic acid metabolism 274
collagen-stimulated activation 289
phospholipases in 276
thromboxane A_2 action 279
thromboxane A_2 and activation of 288
thromboxane A_2 generation 289
Polynuclear aromatic hydrocarbons
dietary sources 192
intestinal absorption 198
Preen waxes 22, 25
Pristane, intestinal absorption 195
Pristanic acid, peroxisomal disorders 42
Prostaglandins, macrophages 225, 226
Protein
biomembranes 4
dietary, brown adipose tissue thermogenesis 72
turnover in obese Zucker rat 59
Protein kinase C
acetyl-CoA carboxylase phosphorylation 127
brown adipose tissue 85
platelets 286
Protein kinases, phosphorylation of acetyl-CoA carboxylase 121, 131, 133
Protein phosphatases, acting on acetyl-CoA carboxylase 129, 135

Refsum's disease 35, 41, 181
Reptiles, lipid water barriers 19
Retina, VLCFA 171
Retinoid binding protein 246, 249
Retinoid binding protein genes 263
Retinol, platelet activation 291
Ro 16-8714, obesity 103

S-145 281
Sclerotin 13
Sebum 22
Seed oils 166
cyclic fatty acids in 304
cyclic fatty acids formed during heat treatment 311
Seeds, lipid water barriers 26
Signal transduction, platelets 285, 290, 293
Skin
lipid water barriers 18
VLCFA 167
Soil, VLCFA 154
Solubility-diffusion model, water transport 7
Somatostatin, obese Zucker rat 62
Soybean oil, cyclic fatty acids formed from 315
Sperm, VLCFA 178

Sphingolipids
brain, VLCFA 177
spermatozoa, VLCFA 179
Sponges, VLCFA 158, 187
SQ29,548 281
Squalene, intestinal absorption 196
Starfish, VLCFA 165
Sterol carrier protein 2 46
Suberine 165
Sunflower oil, cyclic fatty acids formed from 313
Surface waxes and integumental waterproofing
amphibians 18
aquatic organisms 24
arthropods 12
birds 21
mammals 22
plants 8
reptiles 19
seeds 26

Terpenes, intestinal absorption and metabolism 196
Testis, VLCFA 178
Tetraprenol, platelet activation 291
Thermogenesis, brown adipose tissue 58, 68
adrenergic receptor-mediated responses 83
antiobesity drugs 102
assessment 74
blood flow 86
carbohydrate metabolism 80
deficient control of energy intake 99
deficient diet induced 95
deficient thermoregulatory 97
diet 87
growth mechanisms and controls 88
hypothalamus 72
lipid metabolism 76
morphology and innervation 70
nitrogen metabolism 83
obese humans 101
obese rodents 95
obese Zucker rats 59
thyroid hormone metabolism 85
uncoupling protein 72
Thermogenesis, faculative and obligatory 68, 69
Thromboxane A_2 273–301
action in platelets 279
generation in platelets 274
role in platelet activation 288
synthetic ligands 279
Thromboxane A_2/prostaglandin H_2 receptors, platelets
agonists 279
antagonists 280
characterization 281
purification 284
subtypes 283
Thyroid function, obese Zucker rat 62
Thyroid hormone, brown adipose tissue thermogenesis 85, 90, 93
Transacylation, glycerophospholipids 218
Transition temperature, biomembranes 4, 7
arthropod cuticle 17
plant cuticle 12
Transmembrane water flow 7
Transpiration
arthropods 15, 17
plants 8, 10
Triglycerides, digestion and hydrocarbon absorption 193
Triterpenes, plant cuticle 10
Tumour necrosis factor, PAF induced production 236

U46609 279, 281
U46619 279, 281, 285, 289
Ultra-long chain fatty acids, Zellweger's syndrome 39
Uncoupling protein 71, 72, 88, 89

Vegetable oils, cyclic fatty acids in 303, 311
Vertebrates, lipid water barriers 18
Very long chain fatty acids
algae 153
biosynthesis 181
brain and liver 175
eye 171
fish 180
fungi and bacteria 156
isolation and identification 149
mycobacteria 154
nomenclature 148
pathobiochemical defects 180
plant wax, cutine and suberine 165
seed oils 166
skin and hair 167
soil, sediment and peat 154
sperm and testis 178
sponges 158
standards 152
wax-like glands 168
Zellweger's syndrome 35
Very long chain polyunsaturated fatty acids
brain 175
pathobiochemical defects 180
retina 171
sperm and testis 178
Very low density lipoproteins, obese Zucker rat 55

Water–lipid barriers 1–33
amphibians 18
aquatic organisms 24
arthropods 12
biomembranes 3
birds 21
cocoons 28
eggs 26
mammals 22
permeability 6
plants 8
reptiles 19
seeds 26
surface waxes and integumental waterproofing 8
transport mechanisms 7
Waxes
amphibian skin 19
animal hair and skin 167
aquatic organisms 24
arthropods 14–18
birds 22, 25
plant cuticle 9–11
plant, source of dietary hydrocarbon 190
plant, VLCFA 165
seeds 26
wool, fatty acids in 167
Wax-like glands, VLCFA in secretions 168

Yeast
fatty acid binding protein 268
VLCFA 156, 182

Zellweger's syndrome 35–51
bile acids 46
cholesterol 45
ether lipids 43
fatty acids 35
nature of deficit in 47
VLCFA in brain 175, 180
Z-protein 246
Zucker rat
adipose growth 54
brown fat thermogenesis 58, 96
endocrine environment 60
futile cycling 57
hyperphagia 53
protein turnover 59
